## HYDRATANTE

JEAN D'ARCEL  
COSMETIQUE

### More moisture, more nutrients, more protection

There are two causes for dry skin: It lacks moisture or substances that are rich in oil. Both produce different symptoms: With skin that lacks moisture, feelings of tightness and laughter lines are typical, which mainly result from external influences. Skin that lacks oil by contrast does not produce enough oil due to its disposition or with increasing age the epidermis gets thinner resulting in rough skin with scaly patches. The rich moisturizing and nourishing skin care system compensates for all deficiencies with sophisticated active ingredient combinations and restores the skin's natural balance.

## ANTI-AGING SKIN CARE SYSTEM

Anti-aging medical professionals are convinced that the aging process is a consequence of deficiencies. Plant-based phytohormones counteract this phenomenon in a natural way. JEAN D'ARCEL extracts so-called isoflavones from the root of the iris. They stimulate collagen and elastin production and rebuild the skin's barrier while protecting it against losing water at the same time. multibalance® balances the deficiencies of aging skin to increase tone and elasticity, stimulate cell renewal and slow down the reduction in supportive and connective tissue.
